Education

Dr. D Y Patil Institute of MCA and Management, Akurdi, Pune *Completed 2026*
Master of Computer Application (MCA) | CGPA: 8.00/10

C D Jain College, Shrirampur *Completed 2024*
BBA-CA (Computer Application) | CGPA: 7.43/10

Technical Skills

Languages:	Java, Python, PHP, JavaScript, HTML, CSS
Frameworks & Libraries:	ReactJS, Next.js, Node.js, Express.js
Databases:	MySQL, MongoDB, PostgreSQL
Tools & Concepts:	Git, REST APIs, MVC Architecture, JWT, RBAC, Generative AI Integration

Projects

ShopG – AI-Powered Grocery E-Commerce Platform *2026*
ReactJS, Node.js, Express.js, MongoDB, MySQL

- Built a full-stack e-commerce platform with ReactJS frontend and Node.js/Express.js REST API backend using MVC architecture; secured with JWT authentication and RBAC for customer and admin flows.
- Developed Chef AI — integrates Google Gemini API to convert dish names into ingredient lists, then regex-matches them against the live MongoDB product catalog for one-click cart population.
- Built a Smart Substitute module that auto-triggers on zero-stock searches, extracts keywords, and runs a scoped MongoDB query by category to surface in-stock alternatives automatically.
- Designed normalized schemas for products, orders, and users; built a full admin dashboard for inventory, order, and user management.
- Delivered a responsive, mobile-first UI with reusable React components across product catalog, cart, and checkout flows.

EthicalDood – Online Learning Platform *2024–2025*
Java, JSP, Spring Boot, MySQL

- Developed a full-stack LMS with discussion forums, MCQ-based assessments, video lectures, and real-time notifications.
- Implemented secure authentication, role-based admin controls, and an automated plagiarism detection module.
- Built an online code interpreter with multi-file upload support using ProcessBuilder for optimized subprocess execution.
- Managed relational data with normalized MySQL schemas and clean Spring Boot service layers for backend integration.

CineVibe – OTT Streaming Platform *2024*
PHP, MySQL, JavaScript

- Built a full-stack OTT platform with movie listings, category-based browsing, and detailed content views.
- Implemented multi-quality download options and an admin dashboard for managing movies and user accounts via MySQL.
- Designed a clean UI with JavaScript for dynamic interactions and PHP for server-side rendering.

Women Safety App *2023*
Java, Android, MySQL

- Developed an Android SOS app with real-time GPS location sharing and automated emergency calling on button press.
- Integrated trusted contact management, self-defense tutorials, and a secure MySQL backend for persistent user data.
- Designed an intuitive Android UI optimized for quick access during emergencies with minimal interaction steps.

Highlights

- Delivered end-to-end full-stack projects across UI design, REST API development, AI integration, and database architecture.
- Languages: English, Hindi, Marathi
